Team Approach

Question 1: How well do the team members understand the problem?

Exceptionally well, took time to understand it and break it down into the right stages.

Question 2: How are the project tasks achieved?

They were divided equally into design, requirements, testing, use cases, coding (split) and equal work distributed.

Question 3: How did the team approach solving a problem?

We had several meetings to discuss requirements and thus very good problem solving.

Question 4: What approach was taken to solve the problem?

We used the traditional approach where we followed the process step by step but later on adapted the agile approach of making different changes at different stages of development.

Overall Comments on team approach: **Very good coordination and participation as well as communication working together**

Team Coordination of Task Responsibilities

Question 1: How actively did team members take in interest and supported in terms of individual member responsibilities?

There was very coordinated team work and active commitment to getting the project done. Everyone was heavily involved in every aspect of the project.

Question 2: How well did the completion of tasks require active interchanges and sharing of information among members?

We had lab sessions to discuss and other shorter meetings in the course of the semester through the Discord channel to regularly check progress. Towards the end of the project we almost had daily meetings to provide an optimum project.

Question 3: How well did the assignment of tasks to individuals match their expertise?

Everyone had the right level of expertise to handle their task and deliver exceptional work and that was done effectively.

Question 4: How well did the team coordinate individual task assignments?

Everyone was always in the loop with the coordination of tasks and we all delivered as required from each other.

Overall Comments on team coordination of task responsibilities: **Exceptional team coordination**
